Charles has a history of substance abuse, depression, anxiety, and loneliness.

Provided coaching by discussing emotional reactions to an event, discussing barriers and strengths. Charles learned of a camp out that has been planned for the coming weekend. Charles has shown great interest in going with them. We will check if they have room in the transportation that he could go along. Charles does enjoy being with a group and feels comfortable with the men from the transitional home.

Activities are related to identifying interests, setting goals for participation in groups or group activities, or developing skills in structure or utilizing leisure time. Charles is very willing to do things with and in a group, he does participate in well.

Charles does do okay living independent, but does seem to get lonely.

Charles will continue to go to his class and group in Las Cruces and seems really to enjoy that. He looks forward to it every week.
